## **Attachment to Advisory Action**

- 1. Applicant's arguments filed June 09, 2003 have been fully considered but they are not persuasive.
- 2. As per applicant argues that the alleged suggestion or motivation must be found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. The alleged suggestion or motivation does not appear in the cited references. In response to Applicant's argument, Examiner asserts that the motivation and the reason to combine the teaching of Jackowshi and Law to have the storing table in a memory of peripheral because it would make the loading faster and efficient performance between client and server are found and suggested in the cited references as shown in col. 1 lines 6-col. 3 lines 24 (Law's reference USPN 6,330,602).
- 3. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the reason to combine the teaching of Jackowshi and Law to have the storing table in a memory of peripheral because it would make the loading faster and efficient performance between client and server.
